

### **1.5 Lab feedback**

**a)** Were the lab relevant and appropriate and what about length etc?

The lab was relevant and provided a good introduction to new concepts such as MQTT, IoT, and Docker, which are important in IT and networking. It was educational and offered practical experience, but since the area was new to me, the tasks took longer than expected.

**b)** What corrections and/or improvements do you suggest for this lab?

The lab can be clearer with detailed instructions, screenshots, and ready-made templates. Tasks should be divided into steps for easier understanding, and short information should explain key moment
